

OBJECTIVE OF THE PROGRAMME:

1. Undertake land & Water treatment up to 7.29 Lakh hectare of catchment area in 28 blocks of 13 districts in CG

2. Improve cropping intensity of about 3.5 Lakh hectare of Land

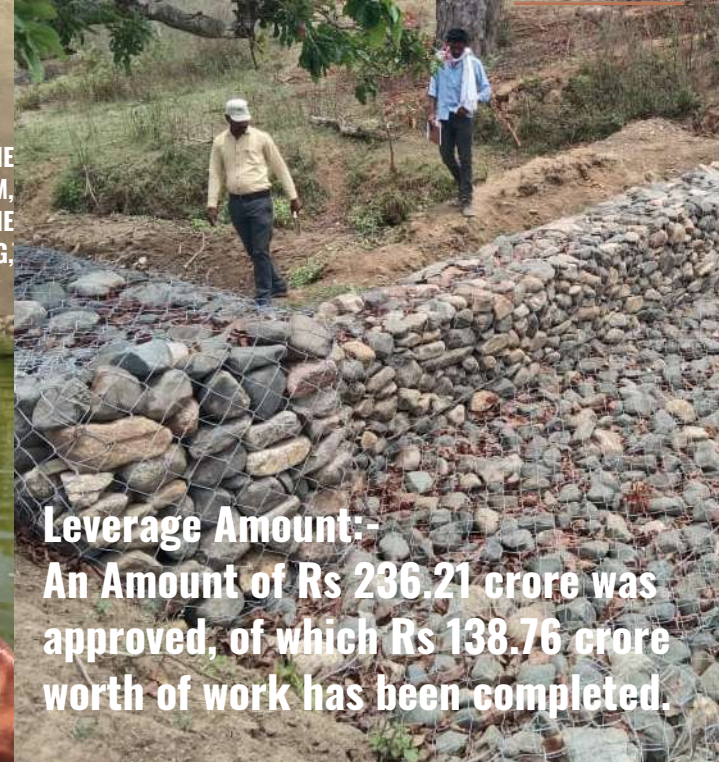

3. Build Capacities of front-line functionaries, PRI's, Community members and CSO's on ridge to valley principles of watershed.

THE COMMUNITY OF 65 GRAM PANCHAYATS, ALONG WITH THE PANCHAYAT REPRESENTATIVES, SHGS AND MNREGA TEAM, PREPARED A DETAILED PROJECT REPORT (DPR) FOR THE TREATMENT OF CATCHMENT AREAS AND RAINWATER HARVESTING, IDENTIFYING 10,583 WORKS.

Fisheries: - 514 Dabri (farm ponds) and community ponds were constructed, connecting 2206 families to fish farming work.

Leverage Amount:-
An Amount of Rs 236.21 crore was approved, of which Rs 138.76 crore worth of work has been completed.

Field treatment:- -
The completed works treated 35,979 hectares of land across 202 microwater sheds, leading to reduced soil erosion, increased moisture, and improved irrigation for Ravi crops..

APPROVED WORK:

Administrative approval for 6,033 works was obtained, out of which 5,255 works were completed.

Crop intensity:- Crop intensity has risen in 19,436 hectares, allowing farmers to take two crops in areas that previously yielded only one

Plantation work:- 436 families were given the work of planting 24000 fruit-bearing saplings so that in the coming time another source could be added for their livelihood

Farmer Producer Group: – We've connected 3000 families across 55 villages in 28 Gram Panchayats to form 60 Farmer Producer Groups. In the Kharif season, cultivation of paddy, arhar (toor daal), tomato, bitter gourd, maize, and kodo-kutki (millets) covering 1711.35 hectares, incorporating technology for increased production and value.

In Rabi, gram, pea, tomato, bitter gourd, and mustard are being cultivated in 1129.77 hectares by 24 Producer Groups, with production just underway.

Rainwater Harvesting:- In the project area's 202 micro watersheds captures 35% of average rainfall.

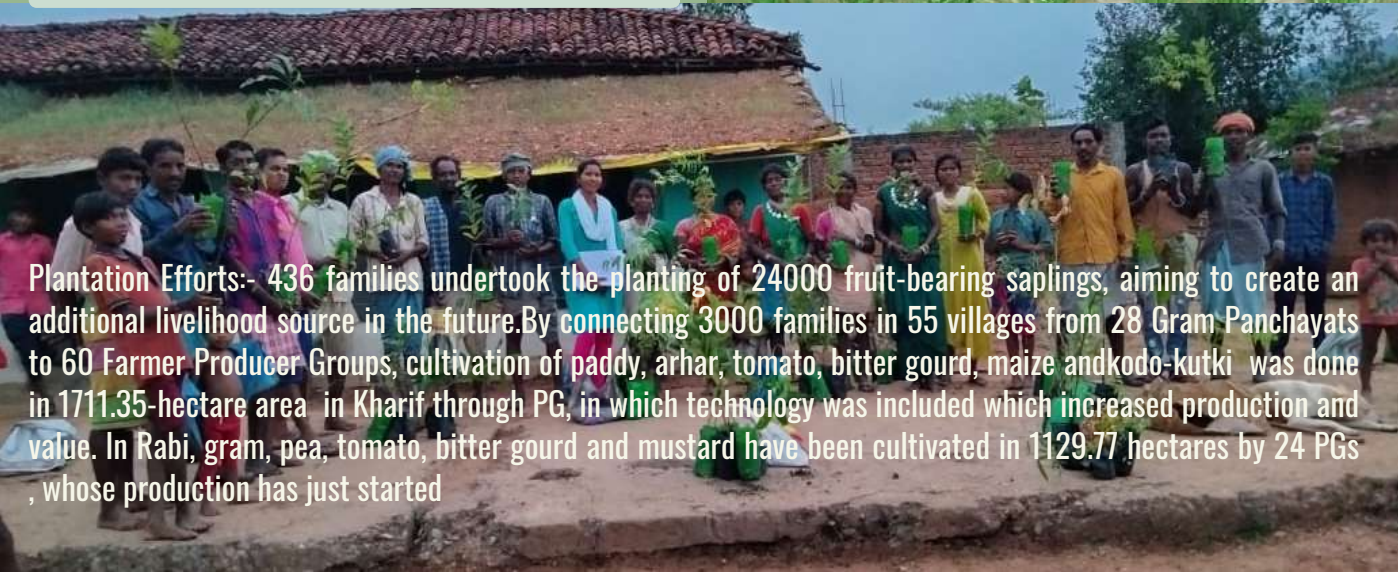

Protective Irrigation:- The facilities cover 14,718 hectares, utilizing water sources for irrigation.

INCREASES IN INCOME:-

Incomes ranging from 0 to 25,000 per year totaled 1,059 initially, but as of 2023, no families fall within this category. The number of families earning 25,000 to 50,000 decreased from 4,314 to 591, while the income bracket of 50,000 to 100,000 experienced a significant increase, rising from 3,615 to 6,383 families. Before the intervention, only 12 families earned above 1 lakh, but now there are 2,026 families in this income bracket.

Plantation Efforts:- 436 families undertook the planting of 24000 fruit-bearing saplings, aiming to create an additional livelihood source in the future. By connecting 3000 families in 55 villages from 28 Gram Panchayats to 60 Farmer Producer Groups, cultivation of paddy, arhar, tomato, bitter gourd, maize and kodo-kutki was done in 1711.35-hectare area in Kharif through PG, in which technology was included which increased production and value. In Rabi, gram, pea, tomato, bitter gourd and mustard have been cultivated in 1129.77 hectares by 24 PGs, whose production has just started
